- Best Mentee Award (soon after completion of training period).
- Best Individual Contributor Award (Received within 6 months of joining).

Note:

During my graduation year i.e., 2022, as the IT market was down unfortunately I couldn't find the right job role to get started with, as applicable to me. So with no other option, instead of waiting for the one, I had to accept this job that had easily and quickly came my way.

Since day-1 till date, my only focus is to work in IT - Software development department, preferred language Java. My long term goal is I'm deeply passionate to excel in coding. As that being said, I'm looking for same to learn and achieve my long term goal.
